130 Litre

New & Improved

Red Sea MAX 130D

The Complete 130 litre Coral Reef System

Fully featured 130 litre coral reef aquarium making reef-keeping easier than ever before.

Red Sea MAX 130D combines all the technology necessary to grow and maintain a healthy reef.

The Max gives aquarists an opportunity to focus on the joy and beauty of the hobby rather than on the component selection and installation. Optimal lighting, filtration, temperature and circulation makes reefkeeping easier than ever before and ensures maximum success for aquarists of all levels.

Reef Filtration & Circulation

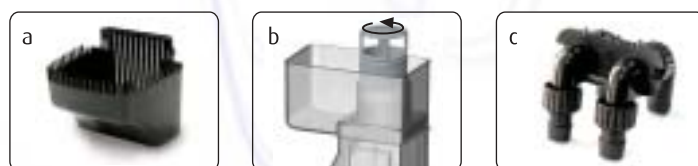

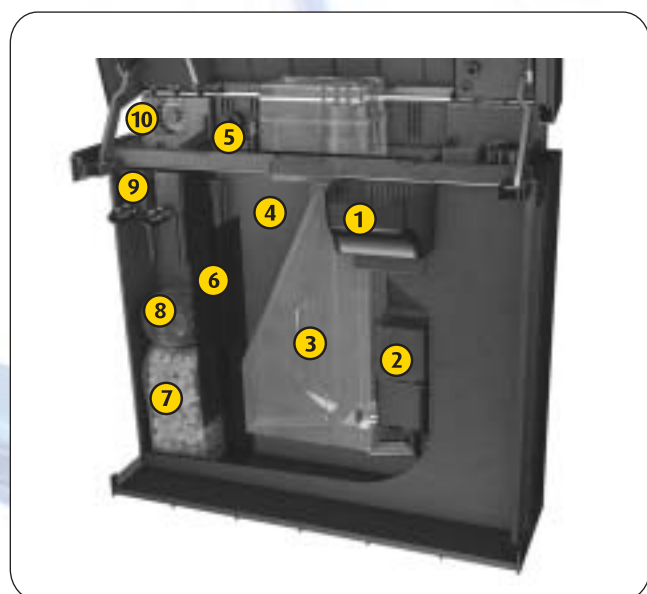

The Red Sea MAX features a complete 4-stage reef filtration system, designed to provide perfect water conditions for all reef inhabitants.

An adjustable height **surface skimmer** (a) takes water from where the highest concentration of waste materials is found.

The turbo air injection skimmer developed specifically for the MAX circulates the water volume through the skimmer more than 3 times per hour at an air/water ratio of 1:3 providing ideal skimming specifications for a hard coral (SPS) reef aquarium. The unique **foam adjuster** (b) ensures that foam can be produced in all water conditions.

Mechanical filtration removes the large organic substances while Phosphate-free active carbon acts as a large chemical sponge; absorbing dissolved organic carbons from the water. Highly porous bio-media provides a huge surface area for nitrifying bacteria.

Additional equipment such as a chiller or an external filter can easily be added with the **Accessory kit** (c) supplied with each unit.

MAX 130D filtration & circulation unit

- 1 - Adjustable height surface skimmer
- 2 - Mechanical filter sponge
- 3 - Professional turbo protein skimmer driven by a 1200 lph pump
- 4 - Compartment for chiller pump
- 5 - Accessory Kit for chiller inlet/outlet tubes
- 6 - Thermostat - controlled heater
- 7 - Highly porous ceramic biological filter media
- 8 - Activated carbon chemical media
- 9 - Twin circulation pumps with adjustable direction outlets
- 10 - Water cooling fan

Reef Lighting

Red Sea MAX

Complete lighting system

- 2x 55w 50/50 10,000k & Actinic T5 Power compact lamps
- 2x Blue LED Moonlights
- Electronic ballast
- High polish textured aluminum reflector
- Fan-cooled hood for extended life of electronic components
- High transparency polished lens

MAX Control

Hood control panel

- 24h programmable lighting timer with integral on/off/auto switch
- On/off switch for moonlights

Main control panel

Conveniently positioned water-proof power switches for all aquarium components

MAX 3-Stage Accessibility

Feeding

Full width front opening for feeding, monitoring and other light maintenance.

Aquascaping

For aquascaping, the entire hood can be raised and secured at an angle that provides full lighting without glare.

Maintenance

For full access to both the aquarium & filtration compartments, the hood can be secured in an almost vertical position.

Dimensions (LxWxH)	610 x 500 x 605 mm	Hood opening	3 positions
Total water volume	130 l	Circulation Pumps	2 x 550 lph
Aquarium volume	110 l	Skimmer water throughput	400 lph
Filter volume	20 l	Skimmer max Air flow	120 lph
Glass thickness	8 mm	Skimmer foam adjuster	✓
Cabinet (LxWxH)	610 x 500 x 800 mm	Heater Wattage	150W
Lighting	2 x 55W T5 Power Compact	Mechanical filter	✓
Lighting- 10,000k	55W	Biological Filtration (active surface area)	420m ² / l
Lighting- Actinic	55W	Activated Carbon	200g
Lighting- Blue LED	2	Power centre	5 outlets
Lighting timer	Analogue	Water Cooling Fans	✓ (external power supply)

Red Sea MAX130D Starter Kit

Contains: 10 kg Reef Base, 7 kg Coral Pro Salt, Hydrometer, Nitro Bac bio starter, upgraded Marine Lab master test kit with Alkalinity Pro test, Calcium Pro test lab, Magnesium test lab, Coral Buff, Calcium & Magnesium Supplements.

Red Sea MAX 130D comes with high quality painted cabinets with ventilation suitable for chillers and is available in 3 different colors: black, silver and white.
